1) If condition is due to an accident, when did your pet's injury occur? How?  
If non-traumatic in origin, how long has your pet had symptoms?

2) Has your pet been getting better or worse?

3) What aggravates the problem?

4) What eases the problem?

- 5) Have there been any new playing or working activities introduced to your pet?
  
- 6) Is the problem/pain worse in the morning, evening, or at night?
  
- 7) What specific functional problems is your pet having? (Example: rising from lying down on tile floors)
  
- 8) What other treatments has your pet received for this problem? When?
  
- 9) What commands does your pet follow (i.e. Sit? Heel?)? What is the word you use for "treats"?
  
- 10) Does your pet have any food allergies? May she/he receive Science Diet treats during the therapy session? (If not, please bring appropriate treats for your pet.)
  
- 11) What is your pet's favorite motivator? (Ball? Treats? Petting?)
  
- 12) How many caregivers for your pet are in the home?
  
- 13) What specific goals do you have for your pet's recovery? (Examples: (1) Climb 4 stairs into home without assistance, (2) Resume jogging 3 miles with me, (3) Regain strength to play with children, (4) Return to hunting.)

## YOUR PET'S ACTIVITY LEVELS

Please circle one number on each of the five scales to indicate your pet's current activity levels.
