

Diane McGee, DVM

Dr. Diane McGee earned both her bachelor's degree in biomedical science and doctor of veterinary medicine at Texas A&M University. Since then, she has worked alongside veterinary specialists in various emergency medicine and specialty hospitals around the country. Her past experiences include practicing medicine at El Abrigado Animal hospital in New Mexico and Emergency Animal Hospital of northwest Austin. She worked for five years at the Animal Emergency Hospital of North Texas, where she was an emergency doctor and hospitalist for a 24-hour emergency and critical care facility. There she was responsible for coordinating patient care among multiple specialists, including internists, cardiologists, surgeons, ophthalmologists, and dermatologists. Most recently she has been an emergency associate at another local specialty and emergency hospital. Dr. McGee currently works in our Critical Care Department as a hospitalist where she collaborates closely with our specialists in triage, coordinating patient care, initiating treatment plans, and providing compassionate interactions with owners and communicating with our referring veterinarians. Her specific areas of interest include toxicology, infectious disease, and gastroenterology.
