

Kristin Coleman, DVM, MS, DACVS

Surgery & Orthopedics

Dr. Coleman graduated with the Biomedical Sciences Dean's Medal and earned her Bachelor of Science in Microbiology from Auburn University in 2008. She continued her education at Auburn University, where she received her Doctor of Veterinary Medicine degree in 2012, along with the Small Animal Surgery Proficiency Award. Following veterinary school, Dr. Coleman completed a rotating internship in medicine and surgery at the Animal Medical Center in Manhattan in 2013. She then pursued a combined Small Animal Surgery residency and Master of Science degree at Colorado State University Veterinary Teaching Hospital in Fort Collins.

In 2016, Dr. Coleman joined a busy private practice in Brooklyn, New York, and a few months later, she became board-certified by the American College of Veterinary Surgeons (DACVS-SA).

Since relocating in early 2019 to GCVS, Dr. Coleman has happily worked as a surgeon and enjoys orthopedic surgery, soft tissue surgery, MIS, and any procedure involving exotics, which has led to her position as liaison to the Houston Zoo. Her textbook, *Techniques in Small Animal Soft Tissue, Orthopedic, and Ophthalmic Surgery*, which was created in collaboration with over 30 other specialists, was published electronically in the Summer of 2024 and printed in the Fall of 2024. In her spare time, she loves traveling, especially when it involves teaching about or performing surgery, running, and spending time with her 3 cats and tiny brown dog.
